

PREVENTIVE HEALTH CARE

A guide to understanding what it is and what's covered

Your Cigna health care plan covers certain preventive care services. Using these services at the right time can help you stay healthier by:

- Preventing certain illnesses and health conditions from happening; or
- Detecting health problems at early stages, when they may be easier to treat

When you receive care in-network, it generally is at a lower cost to you. Depending on your plan, in-network preventive care services may be covered at 100% - but be sure to check your plan materials for details about your specific medical plan.

To make sure you get the care you need — without any unexpected costs — it's important for you to know:

- What preventive care services are and;
- Which services your health plan will cover

What are preventive care services?

Preventive care services are provided during a wellness exam. You and your doctor will determine what tests and health screenings are right for you. The screenings are based on your:

- Age
- Gender
- Personal health history
- Current health

You don't need to have symptoms or be diagnosed with a health issue to receive preventive care services. For example, a flu shot is given to prevent the flu. Other services like mammograms help detect illnesses when there aren't any symptoms. Even if you're in the best shape of your life, a serious condition with no symptoms may put your health at risk.

What isn't a preventive care service?

During your wellness exam, you may receive services that are not considered preventive care services. For example, if your doctor determines that you have a medical issue and you have additional screenings and tests done after a diagnosis is made, this is no longer considered preventive. These services will be considered under your plan's medical benefits, not your preventive care benefits. This means you may be responsible for paying a different share of the cost than you do for preventive care services.

Questions?

Talk with your doctor or call Cigna at the toll-free number on the back of your ID card.

The charts on the following pages list the services and supplies that are considered "preventive care" under your plan.

Together, all the way.®

Offered by: Cigna Health and Life Insurance Company, Connecticut General Life Insurance Company or their affiliates.

Vision screening (not complete eye examination)	●	Ages 3, 4, 5, 6, 8, 10, 12, 15 and 18 or as doctor advises

● = Men ● = Women ● = Children/adolescents

Other coverage: Your plan supplements the preventive care services listed above with additional services that are commonly ordered by primary care physicians during preventive care visits. These include services such as urinalysis, EKG, thyroid screening, electrolyte panel, Vitamin D measurement, bilirubin, iron and metabolic panels.

1. Subject to the terms of your plan's pharmacy coverage, certain drugs and products may be covered at 100%. Your doctor is required to give you a prescription, including for those that are available over-the-counter, for them to be covered under your Pharmacy benefit. Cost sharing may be applied for brand-name products where generic alternatives are available. Please refer to Cigna's "No Cost Preventive Medications by Drug Category" Guide for information on drugs and products with no out-of-pocket cost.
2. Subject to the terms of your plan's medical coverage, breast-feeding equipment rental and supplies may be covered at the preventive level. Your doctor is required to provide a prescription, and the equipment and supplies must be ordered through CareCentrix, Cigna's national durable medical equipment vendor. Precertification is required for some types of breast pump equipment. To obtain the breast pump and initial supplies, contact CareCentrix at 877.466.0164 (option 3). To obtain replacement supplies, contact Edgepark Medical Supplies at 800.321.0591.
3. Examples include oral contraceptives; diaphragms; hormonal injections and contraceptive supplies (spermicide, female condoms); emergency contraception.
4. Subject to the terms of your plan's medical coverage, contraceptive products and services such as some types of IUD's, implants and sterilization procedures may be covered at the preventive level. Check your plan materials for details about your specific medical plan.

These preventive health services are based on recommendations from the U.S. Preventive Services Task Force (A and B recommendations), the Advisory Committee on Immunization Practices (ACIP) for immunizations, the American Academy of Pediatrics' Periodicity Schedule of the Bright Futures Recommendations for Pediatric Preventive Health Care, the Uniform Panel of the Secretary's Advisory Committee on Heritable Disorders in Newborns and Children and, with respect to women, evidence-informed preventive care and screening guidelines supported by the Health Resources and Services Administration. For additional information on immunizations, visit the immunization schedule section of www.cdc.gov. This document is a general guide. Always discuss your particular preventive care needs with your doctor.

Exclusions

This document provides highlights of preventive care coverage generally. Some preventive services may not be covered under your plan. For example, immunizations for travel are generally not covered. Other non-covered services/supplies may include any service or device that is not medically necessary or services/supplies that are unproven (experimental or investigational). For the specific coverage terms of your plan, refer to the Evidence of Coverage, Summary Plan Description or Insurance Certificate.
