

Revolutionize Your Healthcare Savings

TAILORED SOLUTIONS, UNMATCHED SAVINGS, AND MEMBER-CENTRIC CARE

PriceDynamix by AMPS delivers unparalleled savings through precise claim repricing powered by our proprietary technology. We combine member-centric care with unmatched accuracy, ensuring fair pricing, significant cost reductions, and a dynamic healthcare experience for clients and members alike. Experience superior outcomes with PriceDynamix.

Impactful Savings with AMPS

Did you know that smaller claims can account for an additional 5% of claim costs due to errors, and for high-dollar claims, this can be as much as 10%? Overall, you could be wasting another 15% on errors and misguided discounts.

At AMPS, we eliminate these unnecessary costs, providing fair market value and the most savings possible (30-50% over traditional PPOs) at a fair and reasonable price. Don't let high costs and errors drain your resources—choose AMPS for a more accurate and cost-effective solution.

Maximize Savings with ClaimInsight by Editing Claims Prior to Re-Pricing

Our AMPS PriceDynamix model is revolutionizing the industry through the integration of our unique ClaimInsight solution which is backed by the extensive expertise and deep industry knowledge of payment integrity and claims editing. Our team of professionals, who have been in the Payment Integrity space for decades, developed ClaimInsight to fill a critical need in the industry.

Prior to repricing, AMPS runs all claims through our intricate review process, ClaimInsight, that combines physician-led medical bill review and proprietary automated claims editing technology to ensure accuracy and defensibility.

By determining the cost of medical services and procedures based on extensive market-based, historical, data-driven pricing, we deliver value and equitable compensation to members, self-insured employers, and health providers.

This meticulous, data-driven approach means significant savings for our clients. Skipping the crucial step of auditing and editing claims, even in a competitive PriceDynamix scenario, leads to overpayments. In contrast, traditional PPO models lack the right to audit or edit claims, resulting in discounts off inflated numbers and gross overpayments.

The Power of Integration

The AMPS model powers your savings by attacking the price of healthcare claims from pharmacy to medical. With our combined solutions, we are saving organizations close to 85% on their overall healthcare expenditures.

Member-Centric Approach

At AMPS, we believe that exceptional healthcare begins with putting members at the heart of everything we do. Our solutions are not only designed to save money, but also to ensure a positive and supportive experience for members. By offering personalized services such as Care Navigation and Proactive Member Advocacy, we provide members with the guidance and support they need to navigate their healthcare journey with ease and confidence.
